

ENVIRONMENTAL AND PRODUCT SAFETY DATA SHEET

Product

Dental sticks wood

Material

Dental stick: Birch wood

Single piece wrapping: Cellophane

Packaging

Inner: Cellophane and cardboard

Outer: Corrugated cardboard

Field Of Application

For oral hygiene.

EC Directive 94/62/EC on Packaging and Packaging Waste

The packaging complies with all essential requirements as defined by 94/62/EC.

For example minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

Environmental Aspects

Product

The dental sticks is manufactured from virgin FSC certified birch wood.

Packaging

Cellophane is derived from natural sources such as wood. The cellophane wrapping is heat sealed without glue or chemicals.

The corrugated board box is to a large extent made of recycled fibres.

Product Safety

- The sticks comply with EN 71-3 (European standard for migration of certain elements).
- Duni manufacturing units are certified according to the international quality system ISO 9001 and environmental system ISO 14001 as well as to BRC for hygiene.

Management Of Used Products

Energy Recovery

All the materials are suited for energy recovery. Complete combustion gives mainly rise to carbon dioxide and water. The energy content of plastics/paper is comparable to that of oil/ wood.

Recycling

Recycling of the corrugated board is possible for producing new products.

The way cellophane is managed by recycling companies varies in different countries. Check with the local recycling company.

Validity

This is a copy of a document issued 2019-03-07. It is normally updated every second year or when there is a change in the manufacturing process, in the product or in legislation. To make sure that you have the latest edition, contact Duni AB.
